

Edgewise Analog Panel Meters

685 Series

685-1

685-2

685-3

FEATURES

- Model 685 2-1/2" edgewise has been designed without any barrel projection and is fully shielded to allow vertical or horizontal stacking without interaction between movements or other external magnetic fields.
- The specially engineered, rugged D'Arsonval movement with high torque-to-weight ratio provides excellent response and damping characteristics.
- The 685 is offered in DC, AC rectifier-type and VU meter versions.
- The 685 can be ordered in single, dual, or triple stack versions.
- Supplied bezel and mounting hardware enable quick, trouble-free installation.
