

Assiniboine’s Community College’s Len Evans Centre for Trades and Technology (LECTT) offers 130,000 square feet of shops, labs, classrooms and offices. The building provides a modern, integrated, open-concept environment for more than 800 students every year from eight different construction and mechanical trades programs.

Learn by Doing—This isn’t just our motto; it’s our educational philosophy. We provide exceptional learning experiences and many times that means taking you outside of a traditional classroom. We’ll make sure you get the hands-on experience you need so you’re fully prepared for your future. Our programs are designed to connect you with industries and communities for real-world experience and networking.

At Assiniboine Community College's School of Trades, we offer 20 on-campus programs, including pre-employment (level 1 accredited) and apprenticeship technical training. We also offer multiple in-community programs allowing students to attend training in their home communities.

Assiniboine Community College has three trailers that are used to bring trades-related training to Indigenous communities across the province. The trailers allow the college to bring training into communities more easily and cost-effectively as they are equipped with the tools required to meet level 1 accreditation. Each trailer has been outfitted with Apprenticeship Manitoba-approved tools in carpentry, plumbing and electrical.

The three programs being offered — applied building construction, applied electrical installation and applied plumbing installation — will last for five months and can accommodate 15 to 16 students at a time.

At Assiniboine Community College, we are committed to providing our students with the best possible education and training to prepare them for successful careers in various fields. As a technical and vocational institution, we rely heavily on the support of organizations like Stanley DeWalt Tools to enhance our programs and ensure that our students have access to the tools and equipment they need to excel in their chosen trades.

Our students continue to have the opportunity to learn and work with tools that are not only reliable but also trusted by professionals worldwide. This hands-on experience with high-quality tools helps to bridge the gap between classroom learning and real-world application, ensuring our students are better prepared for the challenges they will face in their careers.

We are deeply thankful for your commitment to education and your recognition of the importance of

equipping the workforce of tomorrow. Your donation is not just tools; it is an investment in the future of countless individuals who will go on to make significant contributions to their communities and industries.

We want to express our heartfelt appreciation to Stanley DeWalt Tools for your generosity. Please accept our gratitude and know that your contribution is making a real and lasting difference.

Thank you once again for your generosity.

Kevin Poirier
Dean, School of Trades
