

Rossignol High School would like to thank DeWalt for awarding our school with tools from the DeWalt tools grant from the 2025 National Skills Competition held in Regina.

The tools awarded to our school helped to revive our shop class and program. With these tools we now have students in our shop classes building and constructing various projects, and developing their skills with the tools.

These tools will also help our Robotics Program to continue to grow and strengthen our possibilities.

We are currently in the process of rebuilding our shop program, and these tools have been the driving force! The addition of tools, and the consistency and power of these tools, make it much easier to engage with our students and develop their skills, showing them anything is possible!

Thank you for investing in our students, school, and community. These tools will have a long lasting effect, and provide a positive impact for many years to come!
