

We, the skilled trades instructors at College Sturgeon Heights Collegiate would like to thank DeWalt Stanley Tools and Skills Canada for their very generous donation of tools for the over 400 students in our skilled trades programs. This tool donation has directly benefitted and enhanced four skilled trade courses, Skills Manitoba/Canada competitors, and apprentices entering the workforce. These tools are not only giving our students more experience in the trades but also the experience and confidence to pursue possible career futures in many skilled trades areas. This gives all our students almost limitless opportunity to be productive members of the skilled trades workforce. These new experiences would not have been possible without the use of DeWalt Stanley tools. This is a very special and valuable for our students. These learning processes allowed our students to gain valuable experiences in the Automotive, Carpentry, Electrical and Welding Programs. This is a win/win situation, the students get to use new and top of the line tools, and as the students become familiar and comfortable with these tools, it should become the tool of choice for the future trades people.

Thank you! College Sturgeon Heights Collegiate, Winnipeg, Manitoba

Ron Vermette, Automotive Technology

Gary Yakimoski, Electrical

Kurtis Edginton, Woods Technology

John Schmitt, Welding

What a great start for our apprenticeship!

Thank you DeWalt!!!!!!

New high-quality tools for Auto Tec program.

The electrical trades program can now work with the tools used in industry. Awesome!!!

The welding program has never had such good quality industry standard tools. We are now in it to win it.!!!

The woods technology program is now doing it as the pros do.
