

SKILL SETS  
**Industrial Mechanics**

TEAM CANADA

## **1 INTRODUCTION**

Industrial Mechanics Skill # 1 Skill Set Information

## **2 DESCRIPTION OF SKILL SETS**

Listed below are the skill sets competitors should be familiar with prior to SCNC Vancouver.  
2022

### **2.1 Total Competition time: 15 hrs**

- 1: Predictive Maintenance = 15 marks
- 2: Laser Shaft Alignment = 15 marks
- 3: Fabrication & Welding = 20 marks
- Precision Hand Layout & component install = 20 marks
- Stainless Steel Tube Bending = 15 marks
- Pneumatics (circuit build and test) = 15 marks

### **2.2 Detail and Assembly Drawings will be in third angle projection.**

### **2.3 Drawings will be dimensioned using the imperial system.**

### **2.4 Safe Working Procedures/Practices must be demonstrated at all times during the competition.**

**Module # 1:**

**Fabrication; Welding; Precision Layout; Stainless Steel Tube Bending and Mechanical Assembly Build.**

- **Fabrication:** Calculations, developments, layout and cutting.  
Tolerances  $\pm 1/16"$  (.0625")

- **MIG Welding:** Mild steel box section, square or rectangular.  
Wall thickness  $1/8"$  (.125").

- **Precision Hand Layout/Work and Hand Tools:** Combination squares, scribes, center punches, hammers, drilling, tapping, hand tools; files, hand drills, etc.  
Tolerances  $\pm 1/64"$  (.015").

- Stainless Steel Tube Bending:** Calculations and allowances, preparation for bending, bending to angles ranging from: 15° to 180°, perform required tube bending operations to the specifications and tolerances, stainless steel tubing will be 6.0 mm in diameter. Tolerances +/- 1/16" (.0625"). Tube will be pressure tested upon completion.

- Mechanical Assembly:** Installation and operation of supplied Festo fluid power components as per schematics, engineering and assembly drawings.

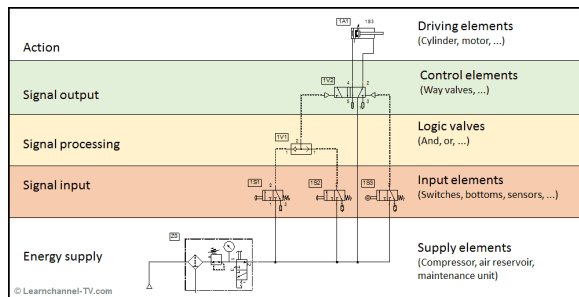

Figure 1C: Basic pneumatic system

Energy flow

## Equipment:

- Lincoln Electric MIG Welder
- (.035" diameter MIG welding wire)

## Module # 2:

### Fluid Power – Pneumatics – Build and Test.

- Build and test the function of a Pneumatic Sequential **“OR”** Cascade circuit as per the supplied schematic diagram, Festo components and accessories.

## Module # 3:

### Predictive Maintenance and Laser Shaft Alignment.

- With the supplied diagnostic equipment record and analyze the machine vibration signature.
- Using standard procedures and protocols rectify the vibration (single plane balancing) and alignment issues using calibrated weights, shims, diagnostic equipment and tooling.

Record the following:

- The exact conditions found (before)
- What actions were performed (with documentation)
- The condition at completion

### Equipment:

- SMC-Balancer <http://www.fixturlaser.com/Shaft-Alignment/Fixturlaser-SMC/>
- NXA Pro <http://www.fixturlaser.com/Shaft-Alignment/Fixturlaser-NXA/FIXTURLASER-NXA-Pro/>

**Additional Training on SMC for Predictive Maintenance Project:**

Fixturlaser (Nathalie Drouin) has kindly agreed to do training via “Skype” for competitors and trainers closer to the competition next year. Time and date to be announced.
