1 THE SKILLS FOR SUCCESS FOR CAREERS IN THE SKILLED TRADES AND TECHNOLOGY

In response to the evolving labour market and changing skill needs, the Government of Canada has launched the new Skills for Success (*former Essential Skills*) model defining nine key skills needed by Canadians to participate in work, in education and training, and in modern society more broadly. SCC is currently working with Employment and Social Development Canada (ESDC) to bring awareness of the importance of these skills that are absolutely crucial for success in Trade and Technology careers. Part of this ongoing initiative requires the integration and identification of the Skills for Success in contest descriptions, projects, and project documents. The next phase and very important aspect of our Skills for Success (SfS) initiative is to provide a *Skills Report Card* to each competitor at the Skills Canada National Competition. The purpose of the report card is to inform the competitor about their current level of nine identified Skills for Success based on their competition scores. With this knowledge, the competitor will be made aware which skill may require improvement. Full implementation is expected in the next Skills Canada National Competition.

The following 9 skills have been identified and validated as key skills for success for the workplace in the legend below:

¹Numeracy, ²Communication, ³Collaboration, ⁴Adaptability, ⁵Reading, ⁶Writing, ⁷Problem Solving, ⁸Creativity and Innovation, ⁹Digital

These Skills for Success have been identified in section 2.4 and/or 3.2 of your Contest Description and if applicable, in your Project and supporting documents.

2 CONTEST INTRODUCTION

2.1 Description of the associated work role(s) or occupation(s)

https://www.skillscompetencescanada.com/en/skill_area/electrical-installations/

2.2 Purpose of the Challenge

Assess the contestant's skills and abilities performing various installation tasks in the field of residential, commercial and industrial electrical wiring.

2.3 Duration of contest

12 hours

2.4 Skills and Knowledge to be tested.

Throughout the final contest, contestants can expect to be evaluated in one, two, three or all the following areas:

- Installing residential, commercial wiring and control systems
- Installing branch circuit components

- Installing heating equipment and controls
- Installing motor control systems
- Installing communications systems, wiring devices and various types of detectors
- Install and program an “Zielo” intelligent relay using the relay faceplate or laptop
- Trouble shooting using test instruments.

3 CONTEST DESCRIPTION

3.1 List of documents produced and timeline for when competitors have access to the documents on the Skills/Compétences Canada website

DOCUMENT	DATE OF DISTRIBUTION
Blueprint	December 2022

3.2 Tasks that may be performed during the contest

- Contestants must demonstrate mastery of the following technical skills:
 - Measuring and marking dimensions on a work surface using scale plans and drawings based on the metric or imperial measuring system;^{1, 5}
 - Measuring and accurately marking the location of outlets and drilling holes on control panels;¹
 - Installing electrical equipment, cables, conduit, tubing and raceways;
 - Measuring and bending tubing and conduit;¹
 - Measuring, sawing, drilling, deburring metals and plastics;¹
 - Assembling components using screws, staples and bolts;
 - Linking lines and equipment to control panels and their components;⁷
 - Wiring and connecting electrical components;
 - Wiring and programming of an intelligent relay;
 - Identifying and marking conductors according to plans and drawings;⁵
 - During the competition, competitors will be required to complete a trouble shooting exercise using provided test equipment. The competitor will be assigned a time to complete this task.⁷
- Contestants must demonstrate mastery of the following theoretical skills:
 - Reading, interpreting and executing plans, drawings, diagrams and schematics in compliance with standards;^{5, 6}

- Reading, interpreting and executing manufacturer's technical specifications for the electrical components to be installed;⁵
- Knowledge of electrical materials and construction work methods;⁷
- Knowledge of basic electrical circuits;
- Knowledge of basic electrical devices and equipment;
- Knowledge of occupational health and safety regulations;
- Knowledge and application of electrical code requirements in Canada and installation to comply with the current edition of the Canadian electrical code book (CEC current enforced edition).⁵

Skills for Success - ¹Numeracy, ⁵Reading, ⁶Writing, ⁷Problem Solving

4 EQUIPMENT, MATERIAL, CLOTHING

4.1 Equipment and material provided by Skills/Compétences Canada

- Work bench
- Ladder
- Access to a 120-volt 15A (5-15R) receptacle
- Manual pipe bender EMT ½
- 3/4" x 6" total length self-feeding ship auger
- Cordless drill - Impact combo pack
- Driver Bit – #2 x 6-inch Robertson
- Driver Bit – #1 x 6-inch Robertson
- Driver Bit – Phillips
- Zelio Smart relay pack with patch cord
- Canadian Electrical Code Book (current enforced edition)

4.2 Equipment and material provided by the competitor

- Supplies for drawing and writing, i.e., pencil, eraser, etc.
- Metric tape measure (or metric/sae combination)
- Set of screwdrivers (Robertson, flat, termination and Philips)
- Termination screwdriver
- Electrician's pliers (lineman pliers)
- Electrical digital multi-meter
- Tri square
- Cutting pliers (side cutters)
- Knife (no utility knives, box cutters etc. Nothing with a replaceable blade)
Must be a lockable or fixed blade type.
- Hammer

- Needle-nose pliers
- Adjustable wrench (crescent wrench)
- Fish tape
- Unibit metal bit, capable of 7/8" hole and/or 1 set manual hole punches for 1/2" knock-outs
- Tapping screwdriver (6/32 - 8/32 – 10/32)
- Metal hack saw
- EMT reaming tool
- Wire stripper
- Torpedo level
- Drywall saw
- Metal file (complete with handle)
- Multi-purpose pliers
- Adjustable pliers (water pump pliers)
- Set of metal drill bits
- Laptop – (optional for programming smart relay)
- Heat gun or heating blanket for bending PVC conduit
- Crimping tool

4.2.1 Toolboxes Guidelines

One of the objectives of SCC is the sustainability of the Competition. As a result, the toolboxes brought by Competitors will be restricted to the following maximum specifications.

The Competitor toolbox must not exceed 0.25 m³ (8.8 cubic feet) in volume. It can be multiple toolboxes, but the total of all toolboxes must not exceed the maximum volume indicated. There is no exception to this rule. If the Competitor toolbox is larger than what is indicated, the Competitor with the guidance of the NTC, will need to remove items from the toolbox and those items will not be used during the competition. All tools must fit inside one or more toolboxes. Tools outside of a toolbox will not be permitted.

4.3 Required clothing provided by the competitor

- Neat and clean – torn clothing is not allowed
- No facial, hand or loose hanging jewellery

5 HEALTH AND SAFETY

5.1 Safety program

SCC has implemented a comprehensive safety program as health and safety is an integral part of our competitions. Our safety program includes guidelines and procedures to make the work environment in each skill area safer.

5.1.1 Safety manual

As part of our program a safety manual has been created to monitor and document health and safety within each skill area. It includes a definite plan of action designed to prevent accidents. The safety manual will be provided for every skill and these instructions must be followed and respected by all participants and officials at the SCNC.

5.1.2 Safety workshop

During orientation, Competitors will participate in a Safety workshop and they will be expected to work and maintain a safe working area during the competition. Any Competitor breaking any health, safety, and environmental rules, may be required to undertake a second safety workshop, this will not affect the Competitor's competition time.

5.2 COVID-19 Protocol

The COVID-19 guidelines will be shared as soon as they are available. The COVID-19 guidelines will be subject to change based on the COVID-19 guidelines in place at the time of the competition.

5.3 List of required personal protective equipment (PPE) provided by Skills/Compétences Canada

- N/A

5.4 List of required personal protective equipment (PPE) provided by the competitor

- Hearing protection
- Safety shoes
- Safety gloves
- Hard Hat
- Safety Glasses

Note: Competitors who do not have the required protective equipment will not be allowed to participate in the competition

6 ASSESSMENT

6.1 Point breakdown

Note: This list is subject to change.

TASKS	/100
Operation	30
Equipment and component installation	10
Intelligent relay operation	7.5

Measurement	10
Cable installation	10
Tubing and conduit installation	10
Connection of conductor to components and equipment	10
Compliance with health and safety rules	5
Fault Finding	7.5

7 CONTEST SPECIFIC RULES

Contest specific rules cannot contradict or take priority over the Competition Rules. They do provide specific details and clarity in areas that may vary from contest to contest. Any additional contest rules will be reviewed during the competitor orientation.

TOPIC/TASK	CONTEST SPECIFIC RULE
Tools / Infrastructure	<ul style="list-style-type: none"> Competitors may not bring tools other than those listed above. No other outside material or manuals are allowed

8 ADDITIONAL INFORMATION

8.1 Interpreter

If a competitor requires the help of an interpreter once onsite during the competition, the Skills/Compétences Canada Provincial/Territorial offices must advise Skills/Compétences Canada National Secretariat a minimum of 1 month prior to the competition or this service may not be guaranteed.

8.2 Ties

- Tiebreaker #1: The competitor with the highest score in the Operation criteria will be declared the winner.
- Tiebreaker #2: The competitor with the highest score in the Health and Safety criteria will be declared the winner.
- Tiebreaker #3: The competitor with the highest score in the Equipment and Component Installation will be declared the winner.

8.3 Test Project change at the Competition

Where the Test Project has been circulated to Competitors in advance, NTC shall change a maximum of 30% of the work content. Please refer to the Competition Rules.

8.4 Competition rules

Refer to the competition rules of the Skills Canada National Competition which can be found on our website.

9 NATIONAL TECHNICAL COMMITTEE MEMBERS

MEMBER ORGANIZATION	NAME
Newfoundland and Labrador	Felix Slaney
Prince Edward Island	Ray Murphy
Nova Scotia	Jennifer Geddes
New Brunswick	To be confirmed
Quebec	Serge Guay - Co-Chair
Ontario	Adam Hicks
Manitoba	Ryan Peters
Saskatchewan	Jay Vollet
Alberta	Elaine Cope
British Columbia	Brock Hartman
Yukon	Aaron France - Chair
Nunavut	Kimberly Smith

Contact the Skills/Compétences Canada national secretariat for any questions or concerns: Nathalie Maisonneuve (nathaliem@skillscanada.com).
