

# Skills Canada National Competition

<b>A. Final Fit and Appearance</b>										
Quality and Presentation										
Quality of Final Press										
Fit on Mannequin including wearability of coat										
Final Coat relates to technical drawing										
<b>Possible Total 9</b>		0	0	0	0	0	0	0	0	0
<b>B. Creativity and Suitability Of The Design</b>										
Creativity and originality of design elements										
Design appropriate to fabric										
Suitable for the target market										
Dart has been manipulated										
<b>Possible Total 9</b>										
<b>C. Coat related to technical drawing</b>										
Final garment has all details indicated on drawing										
<b>Possible Total 4</b>										
<b>D. Sewing Construction</b>										
<b>Sewing of seams and darts</b>	<b>8</b>									
Darts and seams face the correct direction and are smooth and pucker free										
Seams are straight with consistent seam allowance										
Inside seam finishes										
Proper stitch tension and Stitch length										
Well Pressed										
<b>Collar/Lapel</b>	<b>10</b>									
Fused										
Quality and thinness of the collar and lapel edges										
Length and symmetry according to the pattern										
Collar/Lapel is neatly attached to the coat										
Collar notch well executed										
Well pressed										

<b>Sleeves</b>	<b>10</b>																		
Quality of sleeve head/well shaped																			
Shoulder Pad																			
Hang of sleeve																			
Underarm seam																			
Appropriate hem treatment																			
<b>Coat Hem</b>	<b>5</b>																		
Appropriate hem treatment																			
Even width and neatly sewn																			
<b>Closure</b>	<b>6</b>																		
Smooth and no puckers																			
Tape exposure even																			
Enclosed and exposed according to specifications																			
Zipper functions properly																			
<b>Lining</b>	<b>10</b>																		
Smoothness of seams																			
Seam finishes																			
Dart construction																			
Appropriate hem treatment																			
Smooth fit to coat body																			
Smooth fit to sleeve																			
Lining pieces adaptated to coat																			
<b>Facing</b>	<b>5</b>																		
Fused properly																			
Graded/bulk reduced																			
Smooth stitching																			
Finishing of facing at hem edge																			
Consistent width																			
<b>Possible Total 54</b>																			
<b>E. DESIGN DETAILS</b>																			
<b>Pockets</b>	<b>8</b>																		
Symmetrical if applicable																			
Level of difficulty																			
Number of pockets																			
Functionality																			
Construction quality																			
Fusing if applicable																			
<b>Design detail 1 - yoke, yoke overlay, design lines</b>	<b>8</b>																		

Level of difficulty									
Number of design elements added									
Symmetrical if applicable									
Construction quality									
Fusing if applicable									
<b>Design detail 2 - pleats vents, gathers, tabs, epaulets</b>	<b>8</b>								
Level of difficulty									
Number of design elements added									
Symmetrical if applicable									
Construction quality									
Fusing if applicable									
<b>POSSIBLE TOTAL 24</b>									
<b>Grand Total</b>
