

A POWERFUL ATTRACTION LEADS TO A GREAT HOOK UP.

THE PERFECT COMBINATION OF ACCURACY & FUNCTIONALITY.

Introducing the innovative new Stanley® FatMax® magnetic tape that makes accurate readings on metal simple with our innovative Tru-zero™ magnetic hook.

We are standing out in another way! The use of a strong rare earth magnet holds the tape securely onto metal surfaces, while the Tru-Zero™ magnetic hook measures accurately every time. The 11' blade standout* with 1-1/4" wide blade has large easy-to-read measurements and is easy to use. Mylar® blade coating extends blade life and helps to prevent rust while the added BladeArmor® coating protects the blade's most used measurements and reduces breakage.

Whatever the job, wherever the jobsite, if it can be imagined, it can be done.

Tape rules are available in 2 sizes: 25' (FMHT33865) and 8m/26' (FMHT33866)
